

Help Us Keep Your (and your neighbor's) Basement Clean and Dry

Having a sewer line back-up into your basement is never a good thing. History tells us that, more often than not, sewer back-ups are caused by people flushing items into the sewer that create a blockage.

Don't let this happen to you!

It's that time of year when folks are doing extra cleaning around the house and try new products to make those jobs easier. We strive to make sure the sewer system stays clear and doesn't back up into buildings. You can help us (and your neighbors) by not flushing

cleaning rags, gloves, personal hygiene items (including towelettes and wipes), diapers, etc. down the toilet. Those items can get caught in sewer lines and lift station pumps which can then cause a sewer to back-up into your basement or the basement of your neighbors.

Please check the packaging for proper means of disposing cleaning products and personal hygiene items. Remember: "Disposable" does not mean "flushable".

On behalf of your neighbors and friends, thank you for helping to keep clogged sewer lines at a minimum!
